

Health Matters

E * N * E * R * G * Y

I knew my friend Patty had vitamins and that vitamins are good for you, but when my husband tried the Vitalizer that she gifted us, I was blown away! We own an HVAC company and my husband works 12-15 hour days, most days. He always comes home barely upright. His first day taking these vitamins, he practically **skipped up the stairs** when he got home. He said he had never felt better, and insisted I order more and then gave them out to our crew. These are amazing! A real game-changer in our household!
Christie

VITALIZER

The "SMART" delivery system used with Vitalizer is so advanced that it is protected by **12 patents!**

The SMART system delivers each nutrient to the precise location in the digestive system to "maximize absorption".

Turn Your Clock Back "39" YEARS ?

I know ... that sounds really "out there"!! But what if a renowned Nobel Prize winner believes this to be true?

Dr. Elizabeth Blackburn, formerly president of the Salk Institute, decided to study telomeres and their role in the aging process.

So what are Telomeres?

Telomeres are the caps that protect the ends of chromosomes, and as we age, telomeres grow shorter and shorter, preventing cells from being able to replenish tissue, which is so necessary to help live a long, healthy life.

Dr. Blackburn made this comment:

We reviewed hundreds of studies One of the most interesting groups we came across was the Shaklee supplement-user population. Two studies, the Landmark Study on long-term users of multiple supplements and the Telomere Study, have shown that the Shaklee population is remarkably healthier than the general population.

Her conclusion was:

“

A statistical analysis based on the preliminary clinical study projects that an 80 year old Shaklee supplement user would have the same telomeres as a healthy 41 year old.

”

Lorri's Comment: I met with my friend Beth Reilly, a very busy, successful Real Estate agent, to share the benefits of Shaklee products, focusing on the supplements. Beth did not have any glaring health issues but after seeing the results of the **Telomere**

Study she was impressed and excited about the potential long term benefits. She purchased Vitalizer Gold and Vivix.

Just one week of using these two products, Beth was excited to reveal that already she could tell an improvement in her **mental clarity!** Beth plans to get her husband started on this program as well.

HOW'S YOUR IMMUNE SYSTEM?

Our bodies are naturally equipped with an immune system that protects us from harmful micro-organisms like bacteria, viruses, fungi, and toxins. Unfortunately, poor nutrition, stress, and external factors like pollution can weaken it, making our body more vulnerable to sickness. But even when prevention fails, our body still has safeguards in place to ensure that the damage caused by these microscopic assailants is either contained or minimized. One of these added layers of security is a natural substance called interferon.

What Are Interferons?

Interferons are a group of proteins that can stimulate various immune cells in the body. They tell your immune system that germs or foreign invaders are in your body, and then trigger your immune cells to fight those invaders.

Because of this, interferons have been identified by scientists, including world-renowned immunologist Dr. Yasuhiko Kojima, as being critical for immune function. Dr. Kojima spent decades screening hundreds of botanicals to identify **natural interferon boosters**. The patented MACH® blend used in NutriFeron was created based on his work. This blend of nutrients has been shown in laboratory studies to naturally increase interferon levels.

Interferon is so potent that pharmaceutical companies started producing it artificially via genetic engineering to treat hepatitis, HIV, and various kinds of cancer. However, this genetically engineered interferon is also incredibly toxic, not to mention prohibitively expensive. On average, one artificial interferon injection costs as much as an entire year's supply of NutriFeron.

NutriFeron

Pumpkin Seed Safflower Flower Asian Plantain Seed Japanese Honeysuckle Flower

With this breakthrough in immune system science, it's now possible to boost your immune system naturally and safely, every day!

It's All About "RESULTS"

My son has had terrible allergies in the spring for the past 7 years, which would trigger his asthma. In doing some research I discovered that allergic reactions begin in the immune system. So last year in the middle of winter I started him on Shaklee's NutriFeron to build his immune system. Spring came and he did not have to use any of his preventive medicine for the allergy season. When I went to the doctor for a physical for another child, my doctor asked me how my son was doing with his asthma. I said he was doing great. The doctor replied, "That preventive medicine really helps during this season." I said, "He's not on any of the preventive medicine you prescribed; but I do have him on an immune system builder through Shaklee." He looked surprised. We continue to see great results with NutriFeron™. What a great product! T. Johnson

The “Clock” Has Been Turned Back!

I used Shaklee’s “Restoring Eye Treatment” for 2 weeks. Yes, I did my entire LIP area as well ... I wanted to see if it would have an impact, and to my delight it even helped that area!

What do you think? Needless to say ... I am shocked at these results in just **2 weeks!** *Lorri*

Restoring Eye Treatment ... is formulated with powerful moisturizing and anti-aging ingredients and botanicals, including a Peptide Blend, Licorice Extract, Lotus Japonicus coupled with Schisandra Chinesis, along with Hyaluronic Acid, Muscadine Grape and Vital Repair+ Complex.

**Reduces puffiness and dark circles &
Visibly firms and hydrates**

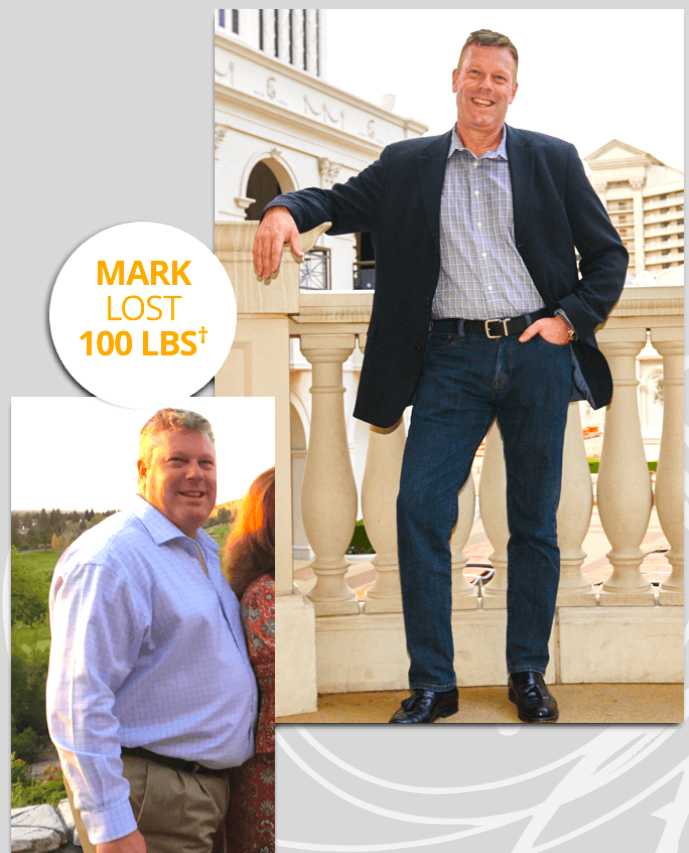

Mark's Story

Shaklee 180 Program does more than just provide essential nutrition. It helps promote a real lifestyle change to live a healthier life.

Before I started the program, I had bad eating habits that included a diet high in red meat and carbs. I was overweight and my cholesterol and blood sugar levels were high. I knew I had to do something to improve my health. I started the Shaklee 180 Program under doctor's supervision and lost 100 pounds within 5 months.

All my key health indicators (blood pressure, cholesterol, blood sugar) are back to healthy levels. This in turn has allowed me to return to the active lifestyle I always wished for. The program does more than just provide essential nutrition—it helps promote real behavior change, awareness, and understanding of how to eat and live a healthier life.

"ADVANCED JOINT HEALTH COMPLEX"

Joint Comfort in as Few as **FIVE** Days

Advanced Joint Health Complex helps your joints feel their best with concentrated glucosamine and a patented, fast-acting form of boswellia extract that's been clinically shown to improve joint comfort in as few as five days.

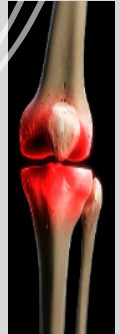

I been a dancer since I was 8 and a competitive gymnast for 8 years. Loved it but injuries hap have pen and while they may not seem crucial at the time, they can come back to haunt you! I still teach dance and am very active.

2 years ago at 51 my knees became excruciatingly painful. Stairs became hard and putting on a smile at my job became more difficult. An MRI confirmed "degeneration" in both of my knees.

When Shaklee chose Bob and I to test their Joint Health Complex, they did not have to ask us twice! My hips had been aching as well and getting out of bed was an exercise in itself.

After 2 days on the product I just got out of bed without evaluation and careful positioning! After 5 days, I had no twinges in my hips or knees. I am so proud of Shaklee.

Pam

Kelly from Custom Cleaning Services LOVES Shaklee Cleaners

"I have been concerned about the safety of my employees, customers' families and their pets. Not knowing any better, my first year of business I used commercial non-green products. Everyday when I came home from work I could barely breathe. My sister, a nurse, told me if I continued using toxic products I could seriously jeopardize my health. This thought encouraged me to 'GO-GREEN'. I was introduced to Shaklee and am very satisfied with the products for the following reasons":

1. Get Clean products are more economical saving me approximately \$4,000.00 annually.
2. Get Clean products are more effective than any other commercially advertised products I have used including both green and non-green products.
3. Scour Off works great on rust stains and splatters in microwaves.
4. Get Clean products are safe on all surfaces including wood floors. I use only 1 tsp. of Basic H2 in one gallon of water.
5. Because they work better and faster, Shaklee products save time (at least 15 minutes per house) so it saves my clients money too.
6. Because of using Shaklee products I have not had to increase my prices to clients in over 3 years.
7. Shaklee products are truly green. Many other so-called green products still contain 1 to 5 toxic ingredients.
8. I like the one stop shopping for supplies. I never have to leave home to purchase and I receive orders promptly.
9. If I have little cuts and scratches on my hands, other cleaners would burn, even vinegar burns, but Shaklee products do not burn and we do not need to wear rubber gloves.

I definitely recommend Shaklee Get Clean products for professionals and all households.

Shaklee Glass Cleaner costs Less than a Penny!

General Purpose Cleaner: about 3 cents; Industrial Cleaner: about 17 cents
